

# SCHOOL BUS OEMS PREPARING FOR BACK- TO-SCHOOL - WHAT YOU NEED TO KNOW

June 11, 2020 :: 1 PM ET

# YOUR QUESTIONS?

Enter your questions through the “Questions” function on the right hand side of the webinar platform

## JOHN BARRINGTON DIRECTOR OF PRODUCT PLANNING, BLUE BIRD

John is a 29-year veteran of the school bus industry, and has held several sales, marketing and product planning positions. He has experience at the manufacturer level, working for Mid Bus, Inc and Thomas Built Buses, and currently holds a position at Blue Bird as the Director of Product Planning. Prior to joining Blue Bird, John spent 7 years managing sales and operations functions at two Blue Bird dealerships. John currently lives in Macon, GA with his wife, Nicole, and has two grown children: Griffin and Emma.

## CHARLES CHILTON DIRECTOR OF PRODUCT DEVELOPMENT, IC BUS

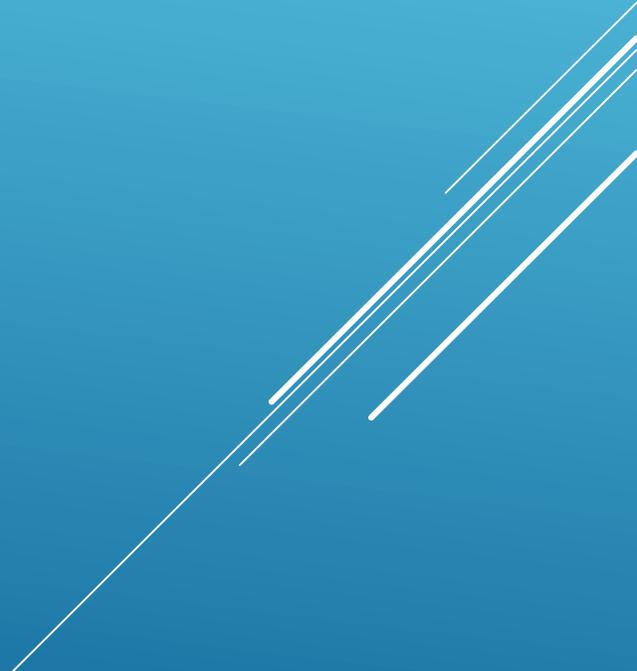

Charles Chilton is currently the Director of Product Development for IC Bus and has over 30 years of commercial vehicle product development experience, including more than 20 years in the school bus industry. Charles has held various senior leadership positions in the commercial vehicle industries, including heavy-duty on-highway tractors, school and commercial buses, emergency vehicles, electric vehicles, stripped chassis, and recreation vehicles. His passion for school buses started in high school when he was a school bus driver and continued as a young engineer with a leading school bus OEM culminating with his current role as the head of product development for IC Bus. Throughout his career, Charles has strived to listen to customers needs and provide practical and effective solutions.

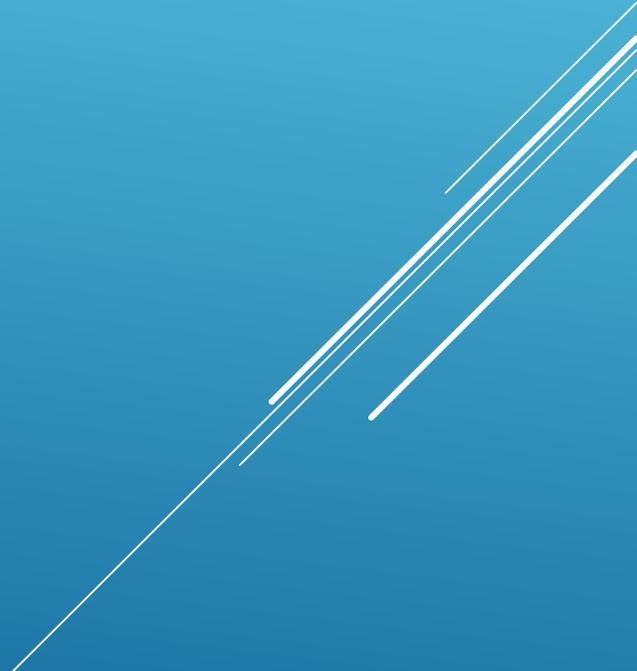

## LESLIE KILGORE VICE PRESIDENT, ENGINEERING THOMAS BUILT BUSES

Leslie D. Kilgore, MPA, MSME is the Vice President of Engineering and Technology at Thomas Built Buses. She is responsible for leading the engineering operations from ideation concept design to full production across all product lines. She adds to the Thomas Built Bus team extensive global experience from both automotive and the aerospace/defense industries in product design, development, launch, innovation and technology management with specializations in interior design, safety and public policy. Her experience includes over 20 years with General Motors both domestically and internationally in strategic product design/development, safety, and public policy across multiple product lines. She leveraged her engineering expertise in the aerospace and defense business where as Vice President of Program Management at L3 Communications Leslie led the largest and most complex RF microwave system delivery and execution in her sector of L3.

# TOPICS WE WILL COVER TODAY

- Similarities between and among OEMs and their customers
  - Helping people that ask for help
  - Randomized introduction of products as temporary solutions
    - Federal Motor Vehicle Safety Standards (FMVSS) 111, 205, 221, 222 & 302
  - Importance of maintenance during the pandemic and before a return to school
- 

# TODAY'S AGENDA

- What are you hearing from school districts/school bus customers?
  - What market intelligence have you captured over the last month in regards to districts taking measures to prepare buses for back to school?
  - Have you seen any districts that have made modifications to their school buses already?
  - When looking into solutions for protecting the driver, what are some things that must be considered from a manufacturing standpoint?
  - What do OEMs see as the biggest challenge with state requirements for COVID-19?
  - What about from an operations standpoint, specifically, keep your school bus clean? Are OEMs able to help customers understand best practices?
  - How can OEMs help districts from a policy standpoint?
- 

# WE'RE HERE FOR YOU
